Gnomi

The institutional intelligence layer Gen Z was never given access to.

North America Launch Strategy

PROBLEM + POSITIONING

GAP

Bloomberg terminal

$24,000/year. What MDs and senior analysts read every morning before markets open.

The student

WSJ + Bloomberg cert + TikTok finance rabbit holes. No synthesis. No institutional framing.

The real problem

Not access, but **interpretation** and focus on the right information. No one gave students the lens their future MD uses.

POSITION

"GNOMI is the institutional intelligence layer that finance-fluent Gen Z never had."

- Not a news aggregator
- Not a financial literacy app
- The translation layer between raw data and institutional judgment
- Not dumbed down, but **leveled up**

TARGET AUDIENCE

The Recruit

Finance-fluent · Target school · Recruiting season

- Already has Bloomberg + WSJ
- Active in finance club, WSG, or student investment fund
- Sophomore/Junior/Senior in IB, PE, or VC recruiting
- Competitive edge = being most informed in the room

"I can pull the data. I can read the report. But when my interviewer asks what's your take I can't answer it the way they do has been difficult part of the interview" - (Friend Interested in investment banking)

CONTENT FLYWHEEL

The self-reinforcing loop

Institutional signal

Fed, M&A, macro

GNOMI translates

Senior analyst lens

Student understands

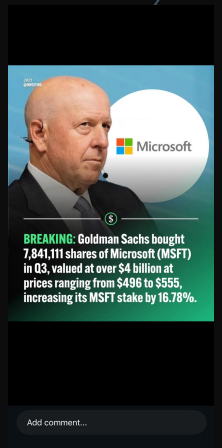

Econ → markets → life

They share the insight

Not app, findings and learning

Network feels the gap

Social demand, College Competition

LIVE: Fed just held rates.

While Twitter panics, here's what the data shows:

— Growth stocks: near-term relief rally

— 10-yr yield already pulling back

— No cut until Q3 at earliest

— EM markets catch bid

Why does a tariff in China crash your ETF?

Watch Ep. 1 — link in bio

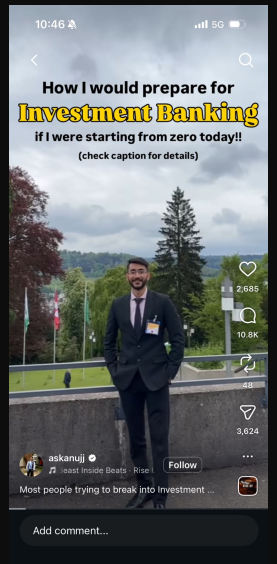

Reddit r/investing

Do we hold the Nvidia stock due to increase in tariffs?

FincStudent: I am going to hold

Gnomi, is happy to share what should be your best choice..

DISTRIBUTION CHANNELS + CREATOR STRATEGY

Campus-first. Credibility-led.

CHANNELS

- Campus finance clubs + WSG chapters
- LinkedIn: Educational content (ex. how does President Election impact the market?)
- Twitter/X: where markets are debated
- Professors + econ dept newsletters
- IB prep communities (WSO, M&I)
- TikTok/IG: 'How to prepare for your IB interview'

WAVE 1 SCHOOLS

Wharton	NYU Stern
Georgetown	UT McCombs
Howard University	Michigan Ross

CREATOR STRATEGY

Credibility creators, not celebrity

Finance PhD students, pre-IPO interns, econ TAs. 10K–100K followers.

They post WITH GNOMI

Not about it: content proves the product works by using it publicly.

The content angle

"I used GNOMI to understand what actually moved markets this week."

WAVE 1 TARGETS

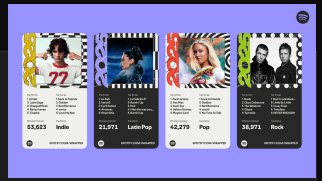

50 Micro-creators with early access

10 Target school campus launches

1K First 1000 signs up on campus wide activations get free access to finance mode (Free Trial)

VIRALITY MECHANICS

The "I knew before you" effect

01

Weekly Signal Card

A designed, screenshot table snapshot: "This week: This what I have learned and how I am implementing it" Built to be posted. Students can showcase to recruiters their initiative.

02

The Translation Moment

Every major market event gets a GNOMI breakdown. Students share it because it makes them look sharp — not because of a referral code. The unit is the insight, not the app.

03

The Superday Story/Build IB Skill Program

"I used GNOMI to prep for my Goldman superday." First mover in the IB prep content category. GNOMI is the tool they name-drop.

- Develop workshops/programs during recruitment season

04 Retention + PR

Campus Leaderboards

Which school has the most financially literate students this week? Campus competition drives organic adoption, group signups, and press coverage.

Which campus has the biggest stock portfolio this week?

North America Launch Roadmap

Phase 1 *Month 1–2*

Seed Campus Credibility

- Plant flag at 5 target universities: 1 finance club + 1 student voice at each
- Onboard 10 micro-creators with early access + My GNOMI profile +
- Free trials to 1,000 power users in active recruiting for banking internships + pr
- Goal: GNOMI = the tool serious students use before anyone calls it a product

Phase 2 *Month 3–4*

Engineer the Trust Moment

- Align with live market event — Fed meeting, M&A wave, or earnings season
- GNOMI publishes the breakdown that goes wide
- Creator superday posts go live simultaneously
- Campus leaderboard launches + first press coverage targets

Phase 3 *Month 5–6*

Scale the Identity

- Scale signal card sharing: GNOMI users are known for being most informed
- Grow creator tier to 150 partners across North America
- Expand to 40 campuses — IB prep communities, consulting clubs, founders <25
